

Consumers shop for cookstoves at a market activation event in Ghana.

Radha's Letter

Dear Friends,

It's great to be back in Ghana again, my first visit since the cookstoves sector gathered here for the Clean Cooking Forum last November.

As part of our ongoing efforts to increase adoption of clean cookstoves and fuels, the Alliance recently launched awareness raising and behavior change campaigns in a number of our focus countries, including one currently under way in Accra. It's been incredible to see these activities first hand, watching as hundreds

of consumers learn about -- and ultimately purchase -- a new cookstove at a local market.

The Global Alliance for Clean Cookstoves is a United Nations Foundation-hosted public-private partnership to save lives, improve livelihoods, empower women, and protect the environment by creating a thriving global market for clean and efficient household cooking solutions. The Alliance's goal calls for 100 million households to adopt clean and efficient stoves and fuels by 2020. The Alliance is working with over 1500 public, private, and non-profit partners to accelerate the production, deployment, and use of clean cookstoves and fuels in the developing world.
